Books & Papers mainly on Mollusks

Terms of sale (exerpt): All prices are in € (Euro) **net** (customers of the EU have to pay an additional 7% VAT) plus postage (reg. book-parcel, surface, approx. 4,30 €/kg plus 2,05 € registration). Please don't mix up the currency i.e. € (Euro) with US-\$! Transport at the buyers risk. Returns are only accepted within 7 days after receipt.

Payment is due on receipt of invoice and may be made by internatn. postal money order or money transfer to our bank account. We also accept **VISA-, Amex- and Master-credit-cards** free of charge. For payments by **private cheque**, not drawn on a German bank we unfortunately have to **add an additional 15 €** (due to high bank-charges). The cheapest way for customers of the EU is a money-transfer to our bank-account (use IBAN and SWIFT to get it at national charges). For customers from outside the EU, credit-card-payments are the cheapest and quickest. You also may pay with PayPal and Western Union.

New customers may be asked to pay in advance or with a credit-card.

Prices of new books are subject to publishers revision and fluctuating exchange rates. If an increase is less than 10% the order will be fulfilled **without prior notification**. As many new books are obtained to order from abroad, there may be a **delay** in delivery (**up to six months**). You will be notified that the item will be delivered at a later date. If you wish to cancel your order for such items due to the delay please notify us immediately.

This catalogue supersedes all prior catalogues in regard to price and conditions of sale.

Newly published titles are indicated by grey shading.

The Living Ovulidae

A Manual of the Families Ovulidae, Pediculariidae and Eocypraeidae

By FELIX LORENZ & DIRK FEHSE

The book on Ovulidae and related families reviews and summarizes today's knowledge of these interesting gastropods embracing 254 species and subspecies. The book gives descriptions, discussion, comparison and a critical taxonomic revision of all living taxa. Information on habitat and distribution, rarities and size ranges, along with more than 250 colour plates depicting well over 2000 specimens, including holotypes, and hundreds of *in situ* photos of living animals give the first comprehensive monograph on the "allied Cowries" since CATE's (1973) work in *The Veliger*.

A large gallery of living animals on their hosts is shown, an identification-key to the genera, a complete synonymy and a large account of references make this book an indispensable tool for collectors and scientists

651 pages, including 203 colour plates of shells and 375 illustrations of living animals on 66 colour plates, descriptions of 19 new species and 4 new genera.

The idea for a book on Ovulids had been in both author's minds for a while. In 2003 they met by chance at a shell-show in Paris. On discussing how great it would be to have a modern, illustrated reference on the Ovulidae and related families, they decided to write one. After six years of assembling this book they are hopeful that it will help collectors and scientists to find access to this poorly understood yet fascinating group of gastropods.

Philippine Marine Mollusks

An Atlas of the Described Marine Molluscan Species of the Philippine Islands in 3 Volumes

By GUIDO T. POPPE in cooperation with 70 world-wide known specialists.

Vol. I embraces 69 families, vol. II 25 families of prosobranch mollusks formerly placed in archaeo-, meso- and neogastropods.

Vol. 3 - to be published in late summer 2009 - will contain the Achitonicidae, the opisthobranchs, the marine pulmonates and all the bivalves, cephalopods, chitons, scaphopods, caudofoveates and solenogastres. Altogether roughly 5000 species will be exhibited on approximate 2500 pages and in more than 1000 brilliant colour-plates.
